REFLEX 10 IS A SITTING DUCK

At Reflex 30 or less, attacks aimed at you simply hit — no roll. Dodging is your whole action and the only thing that puts them back at disadvantage. Spend it.

WHEN YOU'RE HIT — RESOLVE LEFT TO RIGHT

1

ROLL WITH THE PUNCH

Spend up to 3 Energy and reduce the damage by that much. Your call, after you see it.

2

SUBTRACT TOUGHNESS

2 per Level the attacker is below you. You are Level 1 — ask the GM what they are.

3

FLOOR AT 2

A hit that lands never deals less than 2. This number is the damage.

4

FLY BACK?

8+ knocked prone, add 4. 12+ through the wall, add 8. Check once — no escalating.

5

APPLY IT

Straight to HP. If HP falls to 5 or less, roll d100 under the damage or you're out.

Fly back is checked once. One hit, one check — the extra 4 or 8 never triggers another.

The KO roll is on the damage taken. At 5 HP or less, roll d100 under it or you are out cold.

HP

/ 10

At 5 or less, every hit means a d100 knockout check. Back to full after a night's rest.

YOUR TURN

Move 30 ft and take one action: use a power, attack, or restrain a downed foe. A punch is 1d6 and free. Spend 5 Energy for a second action, once per round.

DODGING & GRABS

Dodge costs your whole action: every attack on you is at disadvantage until your next turn. Grabs roll under Combat; while you hold on, neither of you moves.

DOWN, NOT DEAD

At 0 HP you are incapacitated. Nobody dies unless you decide it. Restraining a downed foe is an action — that is the capture, and captures make the news.

CAPTURES
